Kata Kunci : Library, Actionsript, Macromedia Flash MX.

Abstract:

Multimedia application programs on the seven wonders of the world was created using Macromedia Flash MX program whose purpose is to create a computer application program that explains and introduces the seven wonders of the world into a menu that can be opened by anyone who is interested and also want to learn or understand from the history of the seven wonders world. From here we just open our home page and then press the next button and then goes to area seven wonders of the world and here we just choose to see the seven wonders of the world. Actionsript Libraries and other usage of this program is a facility that has been provided by Macromedia Flash MX to facilitate the manufacture and organizationed.file-movie files required in the manufacture of the seven wonders of the world.
